Street Regards Recommendations Favorably and Prices Are Hold- ed in Firm Trading.

NEW YORK, Aug. 8.—Trading in stocks today was influenced almost entirely by President Wilson's address which Wall Street interpreted conservatively as well as optimistically accepted exceedingly favorable to the constructive side.

Gains of the preceding session were considerably enhanced, especially in equipments and the wide range of industrials which are expected to show further prospecting by enormous post-war demands.

Balls and food shares, which suffered severely in the several recent declines, are now recovering, a large part of the way, the loss being recovered. In a few noteworthy instances, such as American Car and several of the higher priced specialties, substantially net gains over last week's strong close were made, the market finishing in advance of 2 to 7 points. Sales amounted to 625,000 shares.

General news of the day also favored the market. The July tonnage statement of the U. S. steel corporation was closed in excess of unfilled orders of almost 700,000 tons over the preceding month.

Industrial conditions also improved, as indicated by the return to work of thousands of railroad shopmen, but mercantile business stalled, according to the reviews of the agencies, by reason of the nation against the high cost of living.

Bonds were irregular. Liberty issues as well as internationals, to rate sales, par value, aggregated \$7,250,000.
